

OrganoZipp

Biological Equilibrium Farming™

AFRI COMPLIANCE

CERTIFICATION NO:
AC/P/2018/143

We confirm that Agrilibrum's Manufacturing Plant and Product range conforms to the standards as set down by Afri Compliance Agricultural enhancement product protocols and is certified in terms of:

- ✓ Good manufacturing practices
- ✓ Quality assurance and traceability
- ✓ Good corporate governance
- ✓ Risk management and Bio Security

MANUFACTURED IN SOUTH AFRICA

OrganoZipp is a liquid plant and micro-organism growth and proliferation product. It is a balanced mixture of carbohydrates, amino acids and PhytoFulvic organic acids that supports growth and proliferation of micro-organisms in the rhizosphere and soil. It should be used in products containing live micro-organisms. It is an effective formulation to accelerate biological breakdown of sewerage sludge and in abattoir settling ponds.

OrganoZipp contains *Ecklonia* kelp to support cell division and plant root growth where rhizobacteria can settle and multiply to improve soil health.

OrganoZipp should be used simultaneously with **QCM360** and other microbial products to ensure optimal results in terms of root growth, efficiency of nutrient uptake and utilization as well as effective suppression of pathogens in the soil.

General application:

For annual crops like tomatoes, flowers, potatoes, watermelon, sweet melon, cabbage, lettuce etc. the recommendation is 5 to 10ℓ per ha (with 5 to 10ℓ **QCM360**) applied during the growth period of the crop and should be repeated after the use of nematicides, fungicides or bactericides.

For perennial crops like apples, pears, grapes etc. the recommendation is 8 to 16ℓ per ha (with 15 to 30ℓ **QCM360**) and can be split during the growth period of the crop especially after using nematicides, fungicides or bactericides.

Should be used with any bacterial, fungal or yeast products.

Composition	
PhytoFulvate	25 %
Ecklonia Kelp	10 %
Amino Acids	3%
Carbohydrates	10 %
Product Properties	
S.G:	1.17 ± 0.1
pH:	5.9 ± 0.1
Storage	
Do not store in direct sunlight. Storage temperature- 13°C - 25°C.	
Packaging	
1ℓ - 5ℓ - 20ℓ - 1000ℓ	

Recommendations:

Shake well before use.

OrganoZipp is compatible with most generally used pesticides and fertilizers but always do a simple glass mixture before using with other products.

It can also be used in foliar sprays to stimulate and sustain leaf microbial growth and to suppress leaf pathogens.

Do not use OrganoZipp with alkaline materials.

Agrilibrum is a member of FERTASA and is certified for compliance in terms of set standards audited by Afri Compliance as stipulated in the FERTASA code of conduct.

Certificate Number: FERT-2018-08
