MANUFACTURED IN SOUTH AFRICA

PhytoFulvic 50LC is natural organic liquid concentrate Fulvic Acid derived from plant organic matter.

PhytoFulvic 50LC improves the uptake of nutrients by plants as soil or foliar applications. Promotes quicker germination and faster root and shoot growth.

Promotes soil microbial activity.

PhytoFulvic 50LC is a chelating agent for cation macro- and micro-nutrients.

PRODUCT PROPERTIES

S.G	1.26 ± 0.02
pH of 10% solution	3.5 ± 0.1
Appearance	Dark brown

GENERAL RECOMMENDATIONS

Shake well before use.

PhytoFulvic 50LC is compatible with most generally used fertilizer products. Do not use in strong alkaline solutions.

Dilute 50ℓ **PhytoFulvic 50LC** in 100 liter water. (50% solution)

The 50% solution can be applied with water-soluble fertilizers in the tank solution through the irrigation system or with a tractor sprayer or as a drench at 4ℓ per young tree and up to 16ℓ for large trees

The 50% solution can also be applied to soluble fertilizers or sprayed/applied on top of granular fertilizers at a ratio of 4 to 8 liter per 25kg fertilizer.

When mixing with fertilizers test for compatibility with a small quantity first and only mix enough for one application.

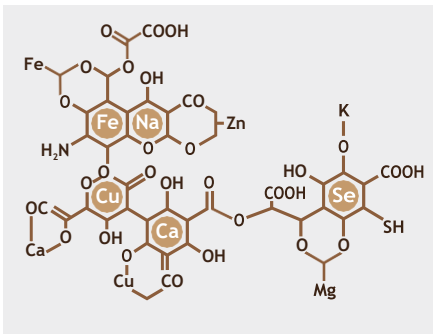

Always add last to water/fertilizer solution and mix well. A slight brown residue might be present that will dissipate after shaking of the container.

COMPOSITION

Fulvic Acid	29.9% (m/m)
Carbon	29.2% (m/m)
Sulphur	2.5% (m/m)
Calcium	2.16% (m/m)

STORAGE

Do not store in direct sunlight.
Storage temperature: 13°C - 25°C.

AFRI COMPLIANCE

We confirm that AgriLibrium's Manufacturing Plant and Product range conforms to the standards as set down by Afri Compliance Agricultural enhancement product protocols and is certified in terms of:

- ✓ Good manufacturing practices
- ✓ Quality assurance and traceability
- ✓ Good corporate governance
- ✓ Risk management
- ✓ Bio Security
