MANUFACTURED IN SOUTH AFRICA

PhytoFulvic 100WP is an organic wettable natural powder concentrate PhytoFulvic Acid derived from plant organic matter. **PhytoFulvic 100WP** improves the uptake of nutrients by plants as soil or foliar applications. Promotes quicker germination and faster root and shoot growth.

Promotes soil microbial activity.

PhytoFulvic 100WP is a chelating agent for cation macro- and micro-nutrients.

PRODUCT PROPERTIES

pH of 10% solution	3.2 ± 0.1
Appearance	Cream / brown powder
Packaging	25 Kg

GENERAL RECOMMENDATIONS

PhytoFulvic 100WP is compatible with most generally used fertilizer products. Do not use in strong alkaline solutions.

Dissolve 25 kg **PhytoFulvic 100WP** in 100 liter water (25% solution).

Apply with water-soluble fertilizers in the tank solution through the irrigation system or with a tractor sprayer or as a drench at 4ℓ per young tree and up to 16ℓ for large trees

The 25% solution can also be applied to soluble fertilizers or sprayed/applied on top of granular fertilizers at a ratio of 4 to 8 liter per 25kg fertilizer.

When mixing with fertilizers test for compatibility with a small quantity first and only mix enough for one application.

Always add last to water/fertilizer solution and mix well.

COMPOSITION

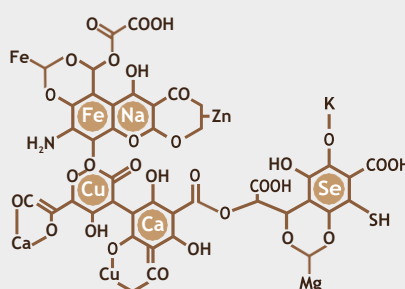

Fulvic Acid	49.8% (m/m)
Carbon	50.1% (m/m)
Sulphur	3.3% (m/m)
Calcium	3.4% (m/m)

STORAGE

The products should not be used in any other way than prescribed.

Do not store in direct sunlight. Storage temperature: 13°C - 25°C.

Keep the bag closed after opening if the full 25 kg is not used. It is hygroscopic and moisture will lead to the product becoming hard.

AFRI COMPLIANCE

We confirm that AgriLibrium's Manufacturing Plant and Product range conforms to the standards as set down by Afri Compliance Agricultural enhancement product protocols and is certified in terms of:

- ✓ Good manufacturing practices
- ✓ Quality assurance and traceability
- ✓ Good corporate governance
- ✓ Risk management
- ✓ Bio Security
