MANUFACTURED IN SOUTH AFRICA

**FYTO-Zn** is an efficient high concentration chelated Zinc product for cation macro- and micro-nutrients, which when dissolved in water before application will result in the total chelation of the  $Zn^{2+}$  to the natural organic fulvic acid molecules of the PhytoFulvic powder, protecting the Zn ion from reacting with Phosphorus in the soil.

### PRODUCT PROPERTIES

S.G	1 ± 0.02
Appearance	Brown/cream powder

### GENERAL RECOMMENDATIONS

**FYTO-Zn** is compatible with most generally used fertilizers except phosphate products.

Do not use **FYTO-Zn** in strong alkaline solutions.

Depending on the severity of deficiency, apply at rates of 10 – 40 kg/ha/season.

The product can be applied through the irrigation system, with a tractor sprayer or in the case of fruit trees, especially young or newly planted trees, as a drench at 2ℓ per young tree and up to 10 ℓ for large trees. A solution should be made of the recommended dosage before application in at least 500ℓ of water per 20kg of the dry product (concentration should not exceed 4%). For drenching the calculation for required volume should be made in terms of number of trees per ha.

### COMPOSITION

Zinc (Zn)	245 g/kg
PhytoFulvic 100 WP	300 g/kg

### STORAGE

The Phyto products should not be used in any other way than prescribed. Do not store in direct sunlight. Storage temperature: 13°C - 25°C. Keep the bag closed after opening if the full 25 kg is not used. It is hygroscopic and moisture will lead to the product becoming hard.

Contact your AgriLibrium Representative for crop specific recommendations.
